AWS SERVICE MANAGER JR. Yman Brother Capital | Zapopan, Jal | jun 2023 - ago 2024

- Led a cost optimization initiative, identifying unused resources in AWS and establishing expiration policies for S3 buckets, resulting in an annual reduction of over \$5,000 USD in infrastructure expenses.
- Implemented a CI/CD solution using GitHub Actions, AWS S3 and IAM to automate the deployment of all company websites, which decreased deployment times by 60%, improved team efficiency by 30% and reduced errors in production by 40%.
- Monitored and resolved technical issues to ensure high availability and optimal performance of services.
- Skills: AWS (Billing & Cost, S3, CloudFront, Route 53, EC2, ECR, IAM).

FRONT-END DEVELOPER JR. Yman Brother Capital | Zapopan, Jal | feb 2023 - ago 2024

- Developed and designed web interfaces for an investment application, allowing clients to view their portfolios, returns, and statistics in real time.
 - Implemented the frontend architecture using Vue.js, Pinia for state management, and Vuetify for CSS structure, improving the efficiency and scalability of the project.
 - Applied UX/UI principles to optimize the user experience, increasing customer satisfaction and platform usability by 20%.
 - Collaborated with the backend team to ensure proper data integration and transmission, implementing security validations and information protection.
 - Developed from scratch the frontend of a website for a real estate company using Next.js, optimizing design and usability.
 - Configured and deployed the infrastructure of the real estate website on Amazon Web Services (AWS), ensuring high availability and security of the site.
 - I implemented and managed the SEO of the projects, achieving an increase in search engine positioning and increasing visibility by 30%.
 - I maintained and updated the web platforms, ensuring their continued performance and adaptation to new business needs.
